

EARLY DETECTION OF CHRONIC KIDNEY DISEASE USING MACHINE LEARNING

Brainstorm & idea
prioritization Ideation
phase

 10 minutes to prepare

 1 hour to collaborate

 2-8 people recommended

DESIGNED BY:

RAGHUNATH N (TL)

ARAVINTH L

DHARAMRAJ G

PRAVIN KUMAR P

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going

10 minutes

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a **How Might We** statement. This will be the focus of your brainstorm.

 *5 minutes*

Problem

**To build a web application
that is powered with
machine learning for
detecting chronic kidney
disease**

Key rules of brainstorming

To run a smooth and productive session

Stay in topic

Encourage wild ideas

Defer Judgement

Listen to others

Go for Volume

Be visual

Brainstorm

Write down any ideas that come to mind that address your problem statement.

 10 minutes

RAGHUNATH N (TEAM LEADER)

Linearity in the prediction

Data processing at period intervals

It captures the real time view of the solution

It simulates the nature of the application features

It shall be the easy web model for first time users

It is powered with web application block

ARAVINTH L

Predicting the disease behaviour with null deviation

It unleashes the future of advancing the trends

Simple usage of the application

It is very crucial in safety privacy of the application

Person 5

Person 6

DHARMARAJ G

Processing the request of the users using automated task

It awards the patients with rewards at each time of web visit

It examines the user expectations and improves further work

It suggests right solutions at the good time complexity frame

It ensures the privacy in data of the users

Allows the users to access the data with ease

PRAVIN KUMAR P

Automation in performing the right task

It is powered with machine learning flow for diagnosis process

It is equipped with latest ML techniques

Good impression of validating the ruser equest

Confident results for first time users

Person 7

Person 8

Accuracy and user assistant

Predicting the disease behaviour with null deviation

Good impression of validating the user request

It ensures the privacy in data of the users

Automation in performing the right task

Privacy handler

It is powered with machine learning flow for diagnosis process

It suggests right solution at good time complexity frame

Confident results for first time users

Random guidance of web features in the data

Positive result

It awards the patients with rewards at each time of web visit

Linearty in prediction

It is equipped with latest ML techniques

It unleashes the future of advancing the trends

Future tech usage

It ensures the privacy in data of the users

Processing the request of the users using automated task

Data processing at periodic intervals

Simple usage of applciation

Method data

It examines the user expectations and improves further work

It is powered with web application algorithms

It is powered with web application block

Simple web design equals ease of data extraction
